Change the Windows Theme

A Windows theme includes the wallpaper used on the desktop as well as settings such as the standard desktop icons (for example, Computer, Network, and Recycle Bin), the visual styles applied to Windows and apps, the mouse cursors, the screensaver that runs when the computer isn't in use, and the sound scheme applied to the operating system. If you get bored with any of the items that are included in the theme, you can change the theme and freshen things up a bit.

To change the Windows theme, follow these steps:

1. Open Settings.
2. Click Personalization. All the available personalization settings are shown.
3. Click *Get more themes in the Microsoft store*.
4. From the hundreds of themes available, select one and install it.
5. Your new theme will appear back on the Themes page. Click on it to make it your Desktop wallpaper.
6. Close Settings.
