

## **CHOOSE THE FOLDERS THAT YOU WANT TO SEE ON THE START MENU**

In addition to automatically listing all the computer's applications, the Start Menu can also show important file folders that can be opened directly without opening File Explorer. Here's how:

1. Open Settings (Windows + I)
2. Click on Personalization.
3. Click on Start.
4. Move down and click on *Choose which folders appear on start*.
5. Turn on any or all of the 10 folders listed.
6. By pressing the Windows key, you can confirm that the ones that you selected are present in the far left column.
