

HOW TO REMOVE MULTIPLE ICONS FROM THE DESKTOP IN ONE MOTION.

Click on each of the shortcut icons you wish to remove while holding down on the Control key. This action will highlight or select all that you have selected. Finally, press the Delete key on your keyboard. The deleted items will be sent to the Recycle Bin where they can be recovered. *Note: The Recycle Bin is the only icon that cannot be deleted from the Desktop using this procedure.*

Unfortunately, Tiles cannot be removed en masse from the Start Screen. Each must be removed individually.
