

MAKE A PRINT COPY OF THE CONTENTS OF A FOLDER

Using File Explorer, printing a list of files contained within a folder is hard work. In fact, it's almost impossible. The following freeware program is a fast and efficient utility downloadable application that lets you print a list of files located in any folder – and in any number of subfolders.

PrintFolder: <http://no-nonsense-software.com/download.html>

PrintFolder is a useful utility for creating a list of files and folders, a feature missing in File Explorer. Right-click on any folder in Windows Explorer and choose "PrintFolder".
