

PIXDAUS: A SITE THAT PROVIDES ACCESS TO THOUSANDS OF FREE PHOTOS THAT CAN BE DOWNLOADED AND SAVED

Follow these steps:

1. From your favorite browser's address bar, type *pixdaus.com*, then <enter>.
2. You will migrate to the Pixdaus Website.
3. This site contains thousands of photographs. Each picture can be saved one at a time to your hard drive or to an external medium, such as your thumb drive.
4. This is an excellent site that contains some remarkable images, almost all of which were taken by amateur photographers with a knack for composing works of art with their digital cameras.
5. There are many ways to view the photos, and tabs near the top of the first page will provide subject classifications. In addition, there is a search box where you can type in your own query.
6. Scroll down through the photographs until you come to one that you would like to save.
7. When you reach the bottom of the page you can either select the Next Page option or you can choose the page number you'd like to view.
8. Right-click on the target photo and click **Save Picture As**. This action will take you to a dialogue box that represents your computer's File Explorer.
9. Select an appropriate folder of your choice to store your selection. It's generally a good idea to send the photograph to your Desktop so that you can locate it easily. Notice that the target photograph is identified by a number. Now is a good time to rename the item to something that makes sense to you. Once you have named the file, click **Save**.
10. Once you view it from the Desktop, you can move it to another folder (Pictures, perhaps) for safe keeping.
11. To save additional photos, simply repeat steps 5 thru 10.
