

## **Place GodMode on Your Desktop as a Super Control Panel.**

GodMode provides a unified, categorized view of all of Windows' far flung features, commands, settings, and functions, all in one place that you can open with a single click.

To activate GodMode:

- a) Right-click on your Desktop.
- b) Select New > Folder to create a new empty folder on your desktop.
- c) Then copy this string of characters below to your clipboard:  
**GodMode.{ED7BA470-8E54-465E-825C-99712043E01C}**
- d) Right-click on the new folder and select "Rename."
- e) Paste the string into the space for the folder's name and press Enter.
- f) Now, whenever you open that folder, up will pop the super menu of options that is GodMode.
