

Reposition your favorite apps to the Start Screen, the Taskbar, or the Desktop

When you open the Start menu, you'll see a small tile for every program on the computer, and you can *pin to start* or *pin to taskbar* any of them with a right-click option. Click on *More* to access the *pin to taskbar* option.

You can also pin any application to the Desktop where it will become a shortcut icon. It's as easy as a *left drag and drop* from its home location to the Desktop on the right.
