

SHOW IMPORTANT SYSTEM ICONS (CLOCK, VOLUME, NETWORK, FOR EXAMPLE) ON THE TASKBAR'S RIGHT SIDE, AKA THE NOTIFICATION AREA/SYSTEM TRAY.

You can easily tweak which system icons appear in the Taskbar's right side.

- 1) Right-click any open area on the taskbar and then click "Taskbar Settings."
- 2) On the taskbar settings page, scroll down toward the bottom and click the "Turn system icons on or off" link.
- 3) You'll see a list of system icons. Toggle each one on or off to suit your needs. As you toggle them, the representative icons will either appear or disappear from the system tray.
