The Edge browser offers a clean and simple read in the font size you prefer.

For a clean and simple layout, select the book icon in the address bar to turn on reading view. This will bring whatever you're reading front-and-center. You can even change the reading view style and font size to suit your mood—**select (…)** identified by three dots in upper right corner of the window, followed by **Settings**. From there, scroll down to Reading section.
