

WHY YOU SHOULD CONSIDER MORE THAN ONE BROWSER

An Internet browser is your window to the web, where you can find almost anything from the comfort of your own computer. Today, the Internet is widely used for media, research, communication, shopping and entertainment. The better your browser, the more you will see and experience.

Why should you use more than one browser? The main reason is that you will have a backup resource. If one browser fails and breaks down, you will always have another one to back you up. Another big advantage is that when you're trying to access a Web page and it's giving you trouble, you can always test it on another browser. That way, you will be able to see if it's the actual browser, the Web site or if it's some problem with your connection or firewall.
